- Fibre Cement
- Flashings and gutters
- Steel Purlins
- Deliveries throughout the South West
- Competitive prices

There are over 300 different profiles available, to identify an existing profile for matching we need the following information

Onduline:

We are stockists of Onduline roofing which is an attractive, lightweight but extremely tough corrugated cladding, which is manufactured from bitumen-saturated organic fibres. They are stocked in 2 metre lengths with an overall width of 950mm, finished in black.

Flashings:

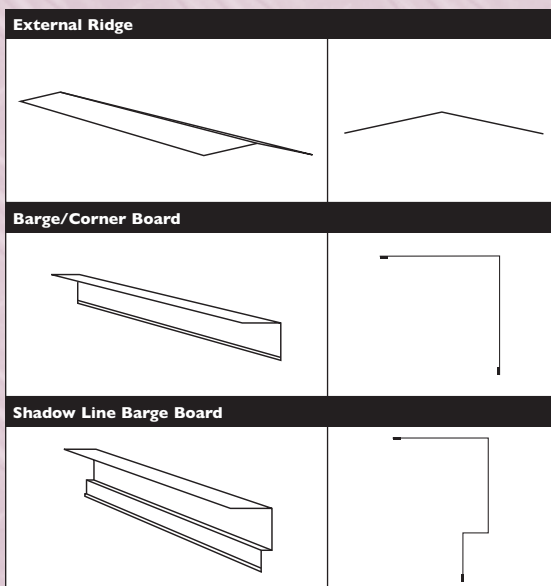

We can supply a comprehensive range of standard flashings. They are available in a variety of gauges and materials including plastic coated, polyester coated and galvanised steel. They are fixed with self-drilling stitcher screws.

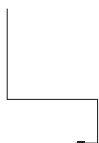

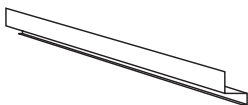

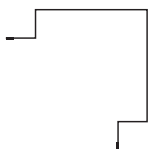

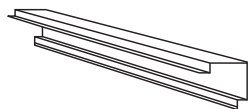

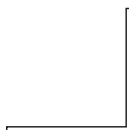

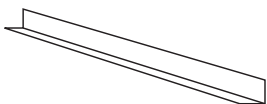

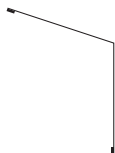

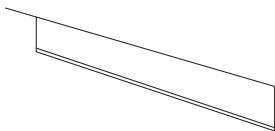

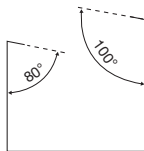

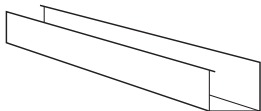

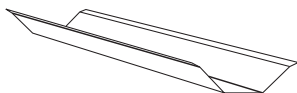

The standard flashing length is 3 metres. Gauges available range from 0.4mm to 2.5mm depending on the finish required. A number of standard lengths corner barges, ridge capping and drip flashings are kept in stock, however we can manufacture to your precise requirements.

Flashings are an essential part of any profile clad building and with the range and colours available, can enhance the aesthetics of any structure.

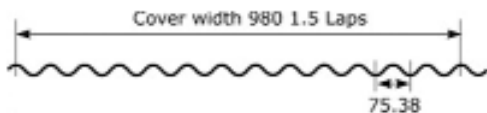

Length	3m (Standard)
Gauges available	0.4mm - 2.5mm
Finishes available	plastic / polyester coated, galvanised

Below you will find images of the range of flashings we supply. If you require technical details on these products or would like to enquire about manufacturing to your custom specifications, please contact our sales department.

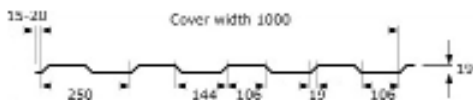

Drip Flashing**Shadow Line Corner Board****Angles****Eaves Trim****Fascia Gutter****Valley Gutter**

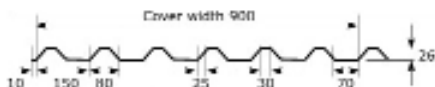

3" Corrugated - Wall and lining panel

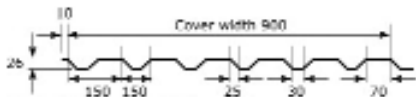

1000/19 - Profile wall and lining panel

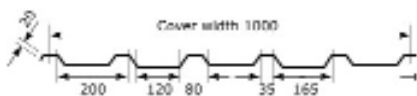

900/26 - Profile wall and lining panel

1000/32 - Profile wall and lining panel

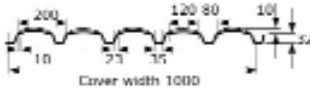

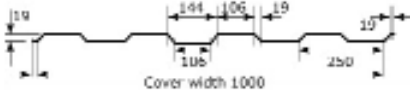

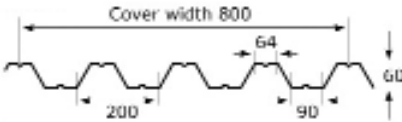

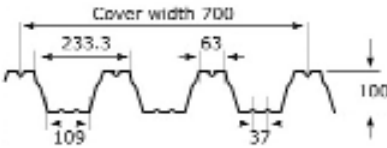

1000/32 reversed - Profile wall and lining panel

Composites - Trisomet composite panel

Ventair system**Profile system****GR60****GR100****Fixings:**

Self drilling tex screws fix in the valley of a roof sheet providing a weather proof seal. There are various types of screws available depending on which material that you are fixing into. They come with a neoprene washer and plastic cap which can be co-ordinated with your steel sheeting for a professional finish. We also stock a full range of power and hand tools.

If required we offer a design and build service and can arrange for someone to call and go through your requirements.
